

Stakeholder Engagement 2016
Services round-table meeting - Goods mobility - Support for rail transport

Title: Proposal for reshaping the incentive system connected to the actual condition of the last mile infrastructure provision of the freight transport system.

SUBJECT:

It is proposed that, within the process of achieving the standards envisaged for Italy by the European Union, FSI should undertake to support finalising the incentives according to the progressive implementation of the infrastructures and to the corresponding increase in environmental protection benefits

PURPOSE:

In order to speed up achievement of the standards through a strategic use of available resources.
